

REMARKS

Reconsideration of this Application is respectfully requested.

Upon entry of the foregoing amendment, claims 25-28, 30, 33, 37, and 46-50 are pending, with claims 46, 49, and 50 being independent claims. Claims 25-28, 30, 33, and 37 are amended. Claims 1-24, 29, 31, 32, 34-36, and 38-45 are cancelled. New claims 46-50 are added. Support for these changes can be found throughout Applicants' specification, including, *inter alia*, pages 3-7 of the written description and Figures 1-4 of the drawings. These changes are believed to introduce no new matter, and their entry is respectfully requested.

Based on the above amendment and the following remarks, Applicants respectfully request the Examiner to reconsider and withdraw all outstanding objections and rejections.

In the Office Action, the Examiner rejects claims 25, 26, 29, 30, 33, 39, 42, and 44 under the second paragraph of 35 U.S.C. §112 as allegedly being indefinite. Paper No. 20060122, page 3. Although Applicants respectfully disagree, these rejections are moot in light of the above Amendment. Applicants respectfully request reconsideration and withdrawal of the rejection of these claims, and allowance thereof.

In the Office Action, the Examiner rejects claims 24-34 and 37-45 under 35 U.S.C. §102(e) as allegedly being anticipated by U.S. Patent 5,933,811 to Angles *et al.* (“Angles”), with inherent references to Gralla’s How the Internet Works (“Gralla”), and to Muller’s Desktop Encyclopedia of the Internet (“Muller”). Paper No. 20060122, page 5. The Examiner additionally rejects claims 24-34 under 35 U.S.C. §102(e) as allegedly being anticipated by U.S. Patent 5,948,061 to Merriman *et al.* (“Merriman”). Paper No. 20060122, page 6. Moreover, the Examiner alternatively rejects claims 24-34 and 37-45

under 35 U.S.C. §103(a) as allegedly being unpatentable over Angles in view of Gralla and Muller. Paper No. 20060122, page 7. Although Applicants respectfully disagree, these rejections are moot in light of the above amendment. Independent claims 24, 32, and 34 have been cancelled, and new independent claims 46, 49, and 50 are added to recite another embodiment(s) of Applicants' invention. New independent claims 46, 49, and 50 recite features and/or limitations that are not taught or suggested by Angles, Merriman, Galla, or Muller, taken alone or in combination with each other. For example, none of these applied documents teaches or suggests, alone or in combination, "analyzing the web page to detect a context for the web page", as recited in independent claims 46, 49, and 50. This feature is not comparable to merely processing a search query as the Examiner alleges is "inherently" disclosed by Angles, Merriman, Galla, and Muller.

Claims 25-28, 30, 33, 37, 47, and 48 depend directly or indirectly from one of the independent claims 46, 49, and 50. Therefore, these dependent claims are patentable over Angles, Merriman, Galla, and/or Muller for at least the reasons stated above, in addition to the particular features recited in the dependent claims. Accordingly, Applicants respectfully request reconsideration and withdrawal of the standing rejections, and allowance of the pending claims.

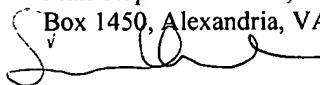

All of the stated grounds of objection and rejection have been properly traversed, accommodated, or rendered moot. Applicants therefore respectfully request that the Examiner reconsider all presently outstanding objections and rejections and that they be withdrawn. Applicants believe that a full and complete reply has been made to the outstanding Office Action and, as such, the present application is in condition for allowance. If the Examiner believes, for any reason, that personal communication will

expedite prosecution of this application, the Examiner is kindly invited to telephone the undersigned at the number provided.

Prompt and favorable consideration of this Amendment and Reply is respectfully requested. The Commissioner is authorized to charge any deficiency or credit any overpayment to Deposit Acscount No. 02-4270.
